

ISSUES RAISED IN THE OFFICE ACTION

Amended claims 1 and 2 and new claims 8-11 are currently pending in the application. Original claims 1-7 were rejected in the Office Action. In this Paper the Applicant amends claims 1, 2 and cancels claim 3-7 and submits new claims 8-11.

In the Office Action mailed November 20, 2002 the examiner rejected Claims 1-3 under 35 U.S.C. § 102(b) as being anticipated by Arends. Claims 4-7 were rejected under 35 U.S.C. § 103(a) as being unpatentable over Arends in view of Cunningham.

AMENDMENT

In the Specification:

On page seven (7) of the specification after the second paragraph, please enter the following paragraphs:

Fig. 7 is a perspective view of the invention showing the inside sidewalls of the present invention and showing the first and second legs of the generally flat base member joined at a 90 degree angle.

Fig. 8 is a perspective view of the invention showing the inside sidewalls of the present invention and showing the first and second legs of the generally flat base member joined at a 30 degree angle.

Fig. 9 is a perspective view of the invention showing the inside sidewalls of the present invention and showing the first and second legs of the generally flat base member joined at a 22.5 degree angle.

Fig. 10 is a perspective view of the invention showing the inside sidewalls of the present invention and showing the first and second legs of the generally flat base member joined at a 60 degree angle.

Fig. 11 is a perspective view of the invention showing the inside sidewalls of the present invention and showing the first and second legs of the generally flat base member joined at a 45 degree angle.

On page nine (9) of the specification after the first paragraph, please enter the following paragraph:

For example commonly used angles of sixty degrees, forty-five degrees, thirty degrees and/or twenty-two and one-half degrees could be used to form the angle between first and second sidewalls 14, 16.

In the Drawings:

The examiner required that drawings showing the angle formed by said first and second legs be included. Figs. 7-11 are provided herewith which show and identify the angles formed between the first and second legs of the generally flat base member.
